- **24 X 7 SUPPORT – SOC-NOC**

FIRST TIME IN THE MIDDLE EAST

Reliable data protection is critical in today's information-driven business environment. However, most small and mid-size businesses continue to labor with manual tape backup processes that have proven to be extremely error-prone-with failure rates as high as 50%. Compounding this risk is the complex and time-consuming nature of tape backup-particularly for businesses with limited IT resources.

Now with DataVault you can experience reliable automated backup and recovery of all your business computers, while eliminating the risks and burden of tape. DataVault provides the industry's only agent-less Disk to Disk backup service in the Middle East, that includes automated remote vaulting of data. Our product is simple to configure and is a zero touch solution once in place.

FULLY AUTOMATED SOLUTION

DataVault is a completely automated solution, eliminating the errors, labor and headaches associated with tape backup. With the DataVault Software Client, online backups are performed automatically, so data is protected without manual intervention. Your data moves through your existing network connection, using state-of-the-art data security including up to 256-bit-AES encryption to our remote DataVault storages spread across the GCC.

Even recovery is automated. You select the data to be recovered from a catalog of archived file versions and DataVault automatically restores the data to your location. With DataVault, the time you save on backup and recovery lets you focus on more mission-critical projects for your business.

KEY BENEFITS

- **Faster backups** -- Disk to Disk solution, No Tapes, No Aspirins, No weekend Nightmares. Just peace.
- **Faster restores** – Restore Files at LAN speeds without waiting for a tape to be retrieved.
- **Disaster recovery** – We have the technology and expertise to get you through it. We can handle the whole process for you, or support you during the rebuild.
- **24 x7 Monitored by experts** - Your online backups are monitored by sophisticated software and protected by Etisalat's Data Center and the NOC and SOC.
- **Suntone Certified** - Etisalat Data Center is fully SunTone Certified for reliability, security and uptime.
- **Automatic offsite data service** - You receive the full benefit of a remote backup service because your data is automatically compressed, encrypted and transmitted to our data center.
- **"Multi-Platform" Agent-less technology** – This means no expensive agents to back up open files on any of these platforms: Windows @ NT / 2000 / XP / 2003, AIX@/ AS400@/ SCO@/ Solaris@, Microsoft@ Exchange, Lotus Domino@, Microsoft@ SQL 2000, MySQL@, Oracle@, PostgreSQL.
- **Bare metal restores** – Rebuild and Restored a complete server, including all the applications, data, permissions and "systems DNA" in less than an hour..

IS YOUR DATA SAFE?

- **93% of companies that suffer a significant data loss are out of business within 5 years. - US Bureau of Labor**
- **20% of SMBs suffer a major disaster every 5 years. - Richmond House Group**
- **Only 35% of SMBs have a comprehensive disaster recovery plan in place. - Gartner**
- **Over 34% of companies do not test their backups and of those that do, 77% found their tape backups failed to restore. - Storage Magazine**

Newest Technology in Backup at work

AGENTLESS ARCHITECTURE

Unlike other online backup services, with DataVault you are not required to install backup software on all the computers you want to protect. Thanks to DataVault's "agentless" architecture, our Client backup software only needs to be installed on one computer to backup and restore to the whole network. This host will collect data from all the devices on the network, process and store the data, encrypt it and send a copy of it to the Digital Store at DataVault.

MULTIPLATFORM SUPPORT & EASE OF DEPLOYMENT

DataVault is as easy as 1-2-3 to deploy, support and use on almost any network - thereby driving down storage management and data protection costs.

We support all common platforms & applications

- Windows® NT / 2000 / XP / 2003, AIX®/ AS400®/ SCO®/ Solaris®/ LINUX
- Microsoft® Exchange, Lotus Domino®, Microsoft® SQL 2000, MySQL®, Oracle®, PostgreSQL.

DATAVAULT V/S TAPE BACKUP

• RELIABLE • SMART • SECURE • FASTER

- AUTOMATED BACKUP SCHEDULING
- ELIMINATES HUMAN ERROR
- ENCRYPTED & SECURED DATA
- RAPID RESTORE & STORAGE OPTION
- SINGLE FILES RESTORED IN SECONDS
- LAPTOPS & DESKTOP BACKUPS
- HIGH AVAILABILITY DISK ARRAYS
- ONLY CHANGES ARE BACKED UP
- BUILT IN DISASTER RECOVERY

say no to Tapes say bye to nightmares

RAPID RECOVERY & RESTORE

With the patented Rapid Recovery feature, a "snapshot" of all data being backed up to the DataVault Digital Store may also be stored locally on the network.

In the event of a data loss, the customer can restore the latest snapshot of the data directly from a machine on the local network instead of over the WAN. Customers are thus able to restore your latest data quickly at LAN speeds - even if you're using inexpensive WAN technologies such as DSL or cable.

COMMON FILE ELIMINATION – NO DUPLICATIONS OF O/S FILES.

DataVault employs Common File Elimination Technology, which eliminates the need to back up common operating systems and software application files that are already stored in our Digital Store vaults. This means that common files will not be counted against your backup storage, which reduces your backup account size and saves you money, time and bandwidth costs. Of Course, these files are available if needed during a restore. Why back your Windows 50 times over when you only need to replicate one copy for all 50 users

THE FIRST DEDICATED ONLINE BACKUP MANAGED SERVICE IN THE MIDDLE EAST

24x7 SUPPORT – EXPERTLY MANAGED

With DataVault, your company's business server data is managed 24x7 by us. We have employed specialized systems and staff that automatically detect problems

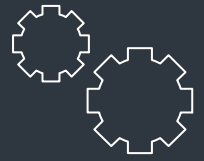

of backup or recovery, initiates corrective action and proactively notify you. We have joined hands with Etisalat's Data Center to provide you with the best platform in the middle-east with a dedicated SOC (Security Ops Center) and a NOC (Network Ops Center) in Dubai and Abu Dhabi.

COST EFFECTIVE & SECURE SOLUTION

Installing and managing a top-class in-house backup and restore solution involves significant capital expenditure. Using DataVault you can take advantage of our Expertise and Infrastructure to INSURE and PROTECT your data without the need for significant capital budget.

You need not exhaust your valuable resources in the complexity and time-demands of installing and managing a backup solution. Leave it to us!!

PROFESSIONAL SERVICES

We provide you with the best Professional Services in Disaster Recovery, Business Continuity, Policy formulation, Security Management, Connectivity, Transmission of Data, Wireless and a full range of Managed Services. Contact us today for more information.

DEDICATED TO GCC

DataVault is the largest and the only managed service for managing your data storage needs in the Middle East. We are based out of Dubai, UAE, with presence in several countries through our alliance partners in Middle East and Africa.

QUICK DISASTER RECOVERY

DataVault have combined our expertise, together with the market leading Asigra® software, to ensure that in the event of a disaster your data is quickly and easily restorable to new hardware, to minimize downtime and the resulting impact on your business-as-usual
